## SMALL DEPOSITORS

There are several reasons why the management of THE FIRST NATIONAL BANK welcomes small depositors, and considers it a matter of good business policy to give equal attention to small and large accounts.

In the first place most of our large depositors started as small depositors. We have had the pleasure of seeing many accounts grow steadily over a period of years and are glad to say that we have helped our customers increase their business and deposits. So far as the Bank is concerned, it is just as satisfactory to have several small accounts aggregating the same as one larger one, because, although there is three times the bookkeeping involved, that is more than offset by the possibilities of development of three different accounts, besides the advertising value to the Bank of three satisfied customers. This Bank's assets of HALF A MILLION, and the owners personal guarantee of an additional \$300,000.00 (something that no other Bank in this section does) making a total of \$800,000.00 or \$3 for every dollar on deposit, its very complete equipment and strong personnel make it the ideal depository for small depositors who expect to be bigger ones.

The officers will be glad to talk over banking relations with you at any time and pledge themselves to serve your interests faithfully when you intrust your business to this Bank. Written personal guarantee given to any depositor on request.

### FOUR KILLED IN JOPLIN MINE

### Roof Caves Without Warning, Catching Workers

Trapped beneath a huge slab of rock twenty feet long, fifteen feet wide, and from two and a half to five feet thick, which fell twenty-five feet from the roof in the north drift of the Coahuilla mine, at Porto Rico, at 11:30 o'clock yesterday morning, four miners were instantly killed, their bodies being mangled almost beyond recognition. The dead:

WILLIAM HAZDEN

The fall came almost without any warning. There was a single ominous creaking sound in the roof, and before the men had an opportunity to run they were caught and ground to the rocky floor by the slab, which apparently fell in a single piece, breaking on impact with the floor.—Joplin Globe.
